

# You Really Got Me

No Mercy

You really got me  
You're the one in my fantasy  
So why do I even wonder  
When all I feel is thunder

You really got me  
You really got me

You really got me, you're all I see  
No other girl can make my heart stand still  
I wonder, maybe you feel the same way too

I'm in a dream, why does it seem  
Like every time I take a chance I fall like under  
Under a spell made for a fool

It's like a curtain on a window  
It's like a a painting on a wall  
Without the one the other is lonely  
When I'm alone I hear you call

You really got me  
You're the one in my fantasy  
So why do I even wonder  
When all I feel is thunder

You really got me  
You're the one in my fantasy  
The one that I wanna pray  
Be sure that here you stay

You really got me  
You really got me

You really got me, how can this be  
I can't deny a love that feels so strong  
It's burning, burning the deepest part of me

It's like a curtain on a window  
It's like a a painting on a wall  
Without the one the other is lonely  
When I'm alone I hear you call

You really got me  
You're the one in my fantasy  
So why do I even wonder  
When all I feel is thunder

You really got me  
You're the one in my fantasy  
The one that I wanna pray  
Be sure that here you stay

You really got me  
You really got me

You really got me, you really got me

It's not a dream, it's reality  
You really got me, you really got me  
Finish what you've started 'cause you really got me

You really got me, you really got me  
It's not a dream, it's reality  
You really got me, you really got me  
Finish what you've started 'cause you really got me

You really got me, you really got me  
It's not a dream, it's reality  
You really got me, you really got me  
Finish what you've started 'cause you really got me
