

# Into The Darkness

No Motiv

Floating up  
I'm floating high up, far into the stars  
Below I feel it beneath me give away  
Earth below, I feel around me  
Echoes of the world dissolve  
This feels like a dream now  
Then it calls  
And it feels so real  
And then light fades away

Darkness pulls me away  
I'm falling into nowhere  
I can't see anything  
I want it, I want it over now

Higher now  
I'm high above the stars light years away  
Alone, this must be a dream now until I feel  
Terrified, I'm falling fast down into the abyss  
The Void is calling me into somewhere else  
And it knows my name  
Then my soul slips away

Darkness pulls me away  
I'm falling into nowhere  
I can't see anything  
I want it, I want it over now  
Death comes knocking again  
I'm falling into darkness  
I can't feel anything  
I guess it, I guess it's over now

Falling into nothing  
Feel my soul now slipping  
Away

Darkness pulls me away  
I'm falling into nowhere  
I can't see anything  
I want it, I want it over now  
Death comes knocking again  
I'm falling into darkness  
I can't feel anything  
I guess it, I guess it's over now
