

We're born We're crying We fall We're trying We're little We're laughing We're lonely sometimes

We grow We open We're lost We're hoping We're careful We're calling We're leaving behind

You say we need to work together With love and care for everyone Without the fighting and the anger You say the world could be as one

But every time that you say we (Love is all we need) (Yeah, yeah, yeah) Do you think about me? 'Cause every time that you say we I hope you think about me

We're strong We're chosen We're scared We're frozen We're hardened We're hopeful We're holding at bay

We take We're giving We shake We're living We're lovers We're sinners We're running away

And if we fail to make a difference And if our hope is almost gone Despite the fighting and the anger You say the world could be as one

But every time that you say we (Love is all we need) (Yeah, yeah, yeah) Do you think about me? 'Cause every time that you say we I hope you think about me

And every time that you say we (Love is all we need) (Yeah, yeah, yeah) Do you think about me? 'Cause every time that you say we I hope you think about me

Do you think about me? (Think about...) (Think about...) Think about me
