Skyline Flame

Nocturnal Rites

Lachrymose they saw him leaving Riding along the skyline flame His shreiks shall forever echo Over valleys and hills Mesmerized by the evil Let the imperial one rule Ornated in blood we stand And in his eyes shone victory

In from the darkness he'll return To his fortress Standing here with pride The skyline flame

Paralyzed by the dark one Riding along the skyline flame The one who leads us in darkness And takes us to the flaming depths We have seen the abyss We crave its infernal deep We light our candles And let them light the way
