

# Welcome To The End

## Nocturnal Rites

Whoa, take a look at this troubled world  
We, the people, that never learn  
Just watch our nations burn

Now, with democracy overturned  
On the news, have you not heard?  
We're at the point, the point of no return  
Ugh

Here is the retribution  
We're gearing up for revolution  
Line up at the barricades  
We'll lead the way  
We are the resolution  
The end of all this destitution  
Looks like destruction comes again  
Welcome to the end

Oh, now the gutters are red with blood  
And the bodies are piling up  
Now we know that it's begun

No, public enemy number one  
Making peace with a loaded gun  
We're at the point, the point of no return

Here is the retribution  
We're gearing up for revolution  
Line up at the barricades  
We'll lead the way  
We are the resolution  
The end of all this destitution  
Looks like destruction comes again  
Welcome to the end  
Whoa

Here is the retribution  
We're gearing up for revolution  
Line up at the barricades  
We'll lead the way  
We are the resolution  
The end of all this destitution  
Looks like destruction comes again  
Welcome to the end
