Fade Away

Noel Gallagher

When I was young I thought I had my own key I knew exactly what I wanted to be Now Im sure Youve boarded up every door Lived in a bubble Days were never ending Was not concerned About what life was sending Fantasy was real Now I know much About the way I feel Ill paint you the picture cause I dont think you live round here no more Ive never even seen The key to the door We only get what we will settle for While were living The dreams we have as children Fade away While were living The dreams we have as children Fade away While were living The dreams we have as children Fade away While were living The dreams we have as children Fade away, away, away They fade away, away, away Now my life has turned Another corner I think its only best That I should warn you Dream it while you can Maybe someday Ill make you understand Ill paint you the picture cause I dont think you live round here no more Ive never even seen The key to the door We only get what we will settle for While were living The dreams we have as children Fade away While were living

While were living The dreams we have as children Fade away While were living The dreams we have as children Fade away While were living The dreams we have as children Fade away, away They fade away, away, away They fade away, away, away Fade away, away, away
