

Breathe With Me

Nomy

I keep you close because you need to
I need you close now to save you
I feel your guilt in you're breathing
It wasn't you that could save him

The way of life I believe in
If you don't love then You are dying
It wasn't you that should save him
It never was

Just breathe with me
Just be with me
Try to close your eyes when it's hard to see
When you're in the dark
When you are alone
There's no one else for me
There is really nowhere else I rather be

I pull you closer against me
And give you all that I can be
You don't control when they're leaving
It wasn't you that could save him

Just breathe with me
Just be with me
Try to close your eyes when it's hard to see
So breathe with me come clarity
Save yourself from all of his misery
