

## Bring Your Guns

Nomy

Ten thousand midgets compressed in to four  
Standing behind me and screaming for more  
they promiss to kill if I dont step aside  
My blood is burning in case we'll colide

I hold my head low like all people do  
wating for the show

So bring your guns How can you ever win  
I can see all your fear I can see where you've been  
So bring your guns how can I ever loose you'll be screaming and  
begging for thruse

Ten thousand midgets compressed in to four  
east became west and there will be a war  
one is the sun how cheated and won  
this profits his brother the collonist Tom

So bring your guns How can you ever win  
I can see all your fear I can see where you've been  
So bring your guns how can I ever loose you'll be screaming and  
begging for thruse

Billy went out to drill a hole  
searching for the water to save your soul  
blood tears sweat and his eyes of lust  
the devils laughter is dry of dust

Satan stood aside and saw Billy chased by law
