

# Free Fall

Nomy

When I was a boy  
Somebody said  
They'll spit on your corpse  
If you play dead

They'll leave you to bleed  
When they are done  
Just hit them twice as hard my son

When I was a boy  
Somebody said  
If you're in a war  
Don't be afraid

Your hand is your gun  
Your point of view  
Your only way to win my son

They are calling you these names  
And the lies behind your back  
And they never really cared at all

You're standing all alone  
Against everyone you know  
And they really want to see you fall

Everyone is who they are  
And they never going to change at all  
Free fall

Everyone is who they are  
You can never really change them all  
Free fall

When you were a boy  
They must have said  
Just nothing at all  
Like you were dead

You're walking around  
They way you are  
If only I could break you down

You're talking like you're someone  
Acting like a true scum  
But you don't know I already won

When everybody comes back  
You're standing on the same map  
Cause you don't really change at all

Everybody's leaving and everybody knows  
You will always be remembered as a bully I suppose

Everybody's leaving everybody's gone  
You will always be the one they told us not to hang around
