

Never Alone

Nomy

You are far from me now
Think about what we said
You can make it around
Because it's all in your head

You've never been lost
You never gave in
Never been alone
I'm Standing beside you/
And every time it hurts I'll share the pain

You've never been away
It's just like before
Everything is ok
When you walk out that door

You've never been lost
You never gave in
Never been alone
When you walk out that door

You've never been lost
It's just like before
Everything's ok
I'm standing beside you

I am far from you now
But the memories we still got
Let them guide you in your dark
Let them tell you what you're not
