

Something Different

Nomy

Today I found something else in my life
Today I saw something new to describe
Today I saw I saw you die all alone

But the sun wont shine when you are not around that's a sign
And the moon wont smile if you would close your eyes

Take my words to your heart that's what I give
Take my pain to your mind Let it live

Today I felt different to because of you
And I wont fall a slepp without you that's different to
