

You and me

Nomy

When I'm awake when I don't live
There's no one here no one to give

You're sitting here you try to see
I'm somewhere else what's wrong with me

I really want to know where we're gonna be
When I can live when I can see

I really want to know where we gonna be
When I'm alive Then It's you and me

You try to understand what's inside of me
This misery what is wrong with me
You try to understand what is on my mind
It's always you, you and me combined

I think it's hard to stay awake
You pull me up I am way to scarred

You understand what I have to do
You're telling me to keep my stand

It's in your eyes - my agony
I'll follow you
Now it's me and you

You try to understand what's inside of me
This misery what is wrong with me
You try to understand what is on my mind
It's always you, you and me combined

I find in you my sacred part
All that I lost my believe in trust
It's in your eyes my agony

You try to understand what's inside of me
This misery what is wrong with me
You try to understand what is on my mind
It's always you, you and me combined

This life This play This pain
You helped me of my way
From my misery what is wrong with me

This life This play This pain
You helped me of my way
From my misery what is wrong with me

This life, this play, this pain
This life, this play, this pain
this pain
