

# We All Bleed

Non Phixion

We all eat, we all shit, we all breathe  
We all fuck, we all love, we all need  
We all pray, we all hope, we all dream  
We all live, we all die, we all bleed x2

I write twelve bars and incite the minds of twelve gods  
Hell's hard, we live in it, existence is our differences  
Non Phixion is like ministers, walk the earth until it finishes  
? jails and free prisoners ?  
We gotta fight for justice, I does it on some freedom by the thug shit  
You love it, know your enemies, pull your gat and bust it  
Trust it, I'm tight-minded, sight the blinded  
Reminded of times when we was young, toy guns was fun  
Things done changed, the game's real life  
Mothers cry, "My baby died last night!" Living dusted, glass pipes  
Poverty bothers me, it's hard to be peaceful  
When they got you trapped and won't release you till there's true equality  
I rhyme disturbed and angry only to offer opportunity  
Regardless of conditions I've got love for my community  
Break immunity, drug sales, overpopulated jails  
If you care then I'll express how it feels

We all eat, we all shit, we all breathe  
We all fuck, we all love, we all need  
We all pray, we all hope, we all dream  
We all live, we all die, we all bleed x2

Hey yo I plan to a billionaire, God forgive me for my evil  
To doing really fucked up things to good people  
I rob the rich man, try to make the world equal  
To buy my moms a crib, dawg, I'm down to hurt people  
The dirt we do, guaranteed that I'm going to Hell  
Going to war, going to jail, going to die  
Bust a slug in the air, drown in my own blood, sweat, and tears  
Spirit wishing I busted first but I failed  
Fuck that, I'm a survivalist liable to fire full clips  
In a matter of seconds, automatic weapons  
Splattering atoms in every direction, we wild out  
Savages go against the righteous  
It's like the AIDS virus, kill you and there ain't no cure  
It's like putting out an album but there ain't no tour  
It's like fiending for some pussy but there ain't no whore  
It's like you hungry for food but there ain't no more  
It's like you fucking with me is like going to war  
Throw you off the top of a building, you going to fall  
It's like walking through the mall just holding my balls  
Everything is everything and the same go for all of y'all

We all eat, we all shit, we all breathe  
We all fuck, we all love, we all need  
We all pray, we all hope, we all dream  
We all live, we all die, we all bleed x2

I ride the path of enlightenment, blast with the hands I fight with  
? welfare, fatigues, knives, and ice picks  
I know my crib's bugged, equipped with pipe bombs and drugs planted  
My guns jamming, how the fuck you sing about love?

Until my son's standing grown man I'll show you it's bugged  
We build pyramids, Aztecs, militant thugs  
Perform my ritual official you can tell by the drugs  
? diss you cause you can tell by the slugs  
I'm like ? new recruits  
? millionaire recluse, computer faggots typing their truth  
My ? spits rounds, it's like the moshpits  
Pitsol lasers like we all lifers, trife like pork with nightsticks  
But I got something better, empty a clip in your blue sweater  
Who's better? Demonstrators aim at the door  
Assassinated by the third joint, I capture you all  
Your shit is manufactured, it couldn't finish the war

We all eat, we all shit, we all breathe  
We all fuck, we all love, we all need  
We all pray, we all hope, we all dream  
We all live, we all die, we all bleed x2
