

Dear John

Norah Jones

Got a house full of walls
And utility bills, every Monday the company calls
Got a nice bed to sleep on
And a chest of drawers where I keep those dreams of yours

'Cause you're always mine to keep when you're gone
Two silvers rings, one's on my finger and the other one's gone
It went underground with you, oh John, oh John

Ten years pass, I ended up with a house full of cats
But most of them went missing
Through that window you never fixed
The door you never latched
You were on your way out the last time

'Cause you're always mine to keep when you're gone
Two silvers rings, one's on my finger and the other one's gone
Went underground with you, oh John, oh John

Knew what you were doing that summer
When Candie came around
I had too much hurt to bother you
We lost our first child, a little pain ... was overdue
And I wanted you so bad

'Cause you're always mine to keep when you're gone
Two silvers rings, one's on my finger and the other one's gone
Went underground with you, oh John, oh John
Oh John, oh John, oh John
Miss you, miss you, oh John
