

# Victorious One

Norther

Again I see the shadows  
crawling in my mind  
I try run but I can't hide

This endless war inside me  
has torn my heart apart  
My minds vengeance will be so sweet

Again I'm on the run  
to kill the pain inside me  
I am the one who cries  
in the dark alone  
Hearing voices,  
I have to kill those evil memories  
You don't know,  
but you have to die beside me

The night is here and I'm close to you  
there is a question for you to answer  
Will you be with me forever  
or will you die, just for me

I'm free 'cause you chose to die  
but it won't change a thing  
The fire in our souls  
has died away  
My heart is evil  
and I have this lust to kill you  
We are together in death  
and so it shall be

With my heart I see the flames again  
they are there for me  
With my evil memories  
I burn in misery  
I know there's a sorrow around you  
but time will heal  
I told you a lie  
that I could never die

The night is here and I'm close to you  
there's a question for you to answer  
Will you be with me forever  
or will you die, just for me
