

## Until The End

Nostradameus

Destroyed again myself and my pain  
Dreams and illusions in vain  
I'm moving on, what we had is gone  
But you will remember my name  
I felt for you, my feelings were true  
But still, enough is enough!  
Now look inside, there's no place to hide  
There's no turning back, there's no coming home  
I used to believe but I couldn't foresee  
There'll be no chance for you and me

I am done now, you are gone now  
So many tears, but it's over my friend  
You are buried, I am thru' now  
But I will be haunting you until the end  
Now we're apart but I'm still playing games with your heart

At night, in your dreams  
What's his name? is it me  
Or someone else that you see?  
I'm having the time of my life, I'm just fine  
But you will never be free (No way!)  
I used to believe but I couldn't foresee  
There'll be no chance for you and me  
Ain't got no soul left, you've torn it apart  
You desecrated my heart!  
You've told me your lies, I've seen your disguise  
And I never close my eyes again

I am done now, you are gone now  
So many tears, but it's over my friend  
You are buried, I am thru' now  
But I will be haunting you until the end  
Now we're apart but I'm still playing games with your heart

I used to believe but I couldn't foresee  
There'll be no chance for you and me  
Ain't got no soul left, you've torn it apart  
You desecrated my heart!  
You've told me your lies, I've seen your disguise  
And I never close my eyes again

I am done now, you are gone now  
So many tears, but it's over my friend  
You are buried, I am thru' now  
But I will be haunting you until the end  
Now we're apart but I'm still playing games with your heart
