

# The Memory Room

Novembers Doom

I have fashioned a secret room  
Within my mind where memories hide  
Between you and I, where life thrives  
For we own the nights stars

Face to fate, I breathe your breath  
I can see your soul through those eyes  
And with a smile from your lips  
I am happily lost in the memory room

Chasing lost years without a single find  
Wishing for more time between our lives  
The culmination of all that is grand  
And our salvation resonates deep  
Within the memory room

In this place we'll hide from light  
Under the stars and sharing the night  
An autumns breeze or summer heat  
We'll plant the seed of tomorrow

You have saved me once again  
From the depth of my own misery  
To feed my youth and repair my dreams  
Born with a fear for dying alone

Chasing lost years without a single find  
Wishing for more time between our lives  
The culmination of all that is grand  
And our salvation resonates deep  
Within the memory room

There is no key to open this door  
This place is ours to determine its yield  
And it is here where I cherish your love  
For the smile was all I ever needed

Chasing lost years without a single find  
Wishing for more time between our lives  
The culmination of all that is grand  
And our salvation resonates deep  
Within the memory room
