

# The Kiss

Nuno Bettencourt

(with D. Zappa)

I remember thinking of you  
When I was alone  
I want to die in  
I thought the world of you  
And I remember morning you're near me  
But I couldn't have you  
You were so far from me  
And I couldn't stand it

I have nothing to hide from you  
Just one kiss  
You know it's true  
The truth is every kiss  
You can get more honest in this

There's nothing that I would do  
Just one kiss  
You know it's true  
The proof is every kiss  
You can get more honest in this

I would never straight from you  
And I will always stay with you  
I want to die in  
No reason to fight it  
You are my heart and soul  
You make me loose control  
And when we're together  
It feels like forever

You're my only one  
My only one  
The one I want  
The only one I want
