

Head in the clouds, feet on the ground,  
Earth falling out beneath me, fire in the sky  
Singing my brow, it's nowhere safe.  
Take me where I'm weightless  
Up there in outer space.  
From up here, everything below is peaceful.  
I'm sincere, when I say I truly miss home.  
Physics is a bitch cause I'm up now,  
But eventually I gotta come down.

Gimmie one good reason  
not to reach those heights again.  
Gimmie one good reason  
Cause I'm finally nearing the end.  
So will you be there,  
Whenever I do come down  
Will you be there?

A moment's peace, a sigh of relief  
Not but what-ifs and maybes unanswered,  
While on my feet.  
So pick me up, take me to far reaches  
While astronomers eyes are shut.  
Cause I'm here, I'm shaking in the distance.  
No fear, blanked out of existence  
Physics is a bitch, the higher I get  
The faster and farther I plummet.

Gimmie one good reason  
Not to reach those heights again.  
Gimmie one good reason  
Cause I'm finally nearing the end.  
Make me believe I shouldn't risk it all again.  
Gimmie one good reason  
Cause I'm finally over the edge.  
So will you be there,  
Whenever I do come down  
Will you be there?

Head in the clouds,  
Feet on the ground.  
Earth falling out,  
Never come down...

Gimmie one good reason  
Not to reach those heights again.  
Gimmie one good reason  
Cause I'm finally nearing the end.  
Make me believe I shouldn't risk it all again.  
Gimmie one good reason  
Cause I'm finally over the edge.  
So will you be there,  
Whenever I do come down  
Will you be there?  
I'm coming down
