

Sign Of Life

Nural

A candle lights my way as I search for more than a common face
But slowly my hope fades along with this dying flame

For all I know we've only just begun but where do we begin
'Cause I find you here left for dead so could you show a sign o
f life
A sign of life

Show a sign of life cause I won't carry your dead weight alone
Despite the light deprived I carry on into the unknown

For all I know we've only just begun but where do we begin
'Cause I find you here left for dead so could you show a sign o
f life

For all I know we have only just begun
I don't even know where to begin
I find you here battered and just left for dead
Could you show a sign of life

For all I know we have only just begun
I don't even know where to begin
I find you here battered and just left for dead
Could you show a sign of life

Take this song of love and disfigure it in any way you can
While you have your chance, cause I'll never sing of love again
, again
