

Burned In

Obituary

Come fool we create.
Follow me your life.
Set in world forth died, lots to define.

Follow the bodies, they're living the past.
The sad truth as cold as the wind, cut through life.
Blind fool we overkill. Chopped at the throat.

Set in, burned, and rot away.
Set in, burned in, and killed away.

Burned in life of hell, left to survive.
Without fears of grave. Lives left to die.
"Where to? " , says the mind, your chance to die.

Set in, burned in, and rot away.
Set in, burned in, and killed away.

Time hurting make the change.
Time hurting waste away.
Inferior certain display.
Falls sense to be convincing.

Be strong your alive.
Be strong to see them die. To see them die.
Come fool we created.
Set in, world forth died
