

# Flowers

## Ocean Colour Scene

Renegades and shifting shades  
And the light's in your face  
And you friend's talk lying  
But some of them got flowers in their room

When it's on and you're falling on every floor  
That you're hoping to score  
And you're every night  
But some of them got flowers in their room

But some of them got flowers in their room  
But some of them got flowers in their room

Hear the word that the man on the stairs  
Knows your every affair and is holding your hand  
And he says some of them got flowers in their room  
And he screams in a face  
But the smile on the face is cool and it's cold  
And it reads vacated  
And some of them got flowers in their room

And some of them got flowers in their room  
And some of them got flowers in their room

And I take someone home and I can't be alone  
And there's faces to please and I walk on the knees  
Oh you see, I got no flowers in my room

And I laugh with my mouth and I laugh with you  
But the joke was a joke that I never really knew  
Some of them got flowers in their room

Some of them got flowers in their room  
Some of them got flowers in their room
