I Love You

Ocean Colour Scene

When the night-time creeps on in
I will be there, I will be there
Come on and let me in
I will be there, I will be there

Don't ever be afraid when I say
I love you, I love you
And I'll take the time to say I love you

Come on, don't shoulder hurt
Take it on back, don't make it worse
Come the night and I will call
I'll take it back, you'll take it all

Don't ever be afraid when I say
I love you, I love you
And I'll take the time to say I love you

Don't be so scared about it
And I just can't be without saying
I love you, I love you
And I'll take the time to say I love you

I love you, I love you
And I'll take the time to say I love you
I love you
