

This Day Should Last Forever

Ocean Colour Scene

All in my heart, it always begins
She keep on trying to make this situation win
Sometimes, you should hold it back
Just keep on the rails on the straight and narrow track

And I know I've been wrong before
But I really believe this day should last forever

These times, we're traveling in
Trying to trying to do your worst to keep on in
But how could you say, that there's nothing left
I'll come around every time you try to hate yourself

And I know I've been wrong before
But I really believe this day should last forever

I'm, leaving today
I'm finding it hard to hear a single word I say
When all of the time, wasted with you
It makes it hard to know exactly what to do

And I know I've been wrong before
But I really believe this day should last forever

I never give out
I had my doubts and now I know that they were you
Just like before, I got myself free
And now it's amazing how the situation seems

And I know I've been wrong before
But I really believe this day should last forever

And I know I've been wrong before
But I really believe this day should last forever
