

When feeding the ones left breathing
It's our only way to live
My minds past growing in the salt
With the bone community
They took my tongue for the things I
Wanted but couldn't but couldn't say

When your taking my child away
My colors will surely change
My voice will be the same
Things were never that way again
After they came and left we're nothing

When your taking my child away
My colors will surely change
My voice will be the same
Things were never that way again
After they came and left we're nothing

Your voice is a cannibal
Your child got taken away
Your life is an open wound
Exposed to all of those around you
Exposed to all of those

Your voice is a cannibal
Your child got taken away
Your life is an open wound
Exposed to all of those around you

Exposed to all of those
Exposed to all of those around you
