Come Home

Oceanlab

I don't know why you feel we can't just talk through
Not just walk through and leave me here
You leave a note and think that it's a clean break
No more heartache you made that clear

I wish that I could back track
Stop time and turn the clocks back
Unpack your bag whilst waving the flag
To keep you close to me

Come home
You know I didn't mean to say the things I said
Come home
Don't leave me here with all these thoughts inside my head

Rewind the lines and find the hidden meanings
Ten more screenings of our last fight
Sitting alone and knowing that I need you
As I remember our first night

I wish that I could back track
Stop time and turn the clocks back
Unpack your bag whilst waving the flag
To keep you close to me

Come home
You know I didn't mean to say the things I said
Come home
Don't leave me here with all these thoughts inside my head

Running away from the truth this time
And I wish that you knew what you left behind
When you were running away
And you left me out of my mind
