

On The Beach

Oceanlab

Say goodbye to all your friends
Time to leave and go home again
Sad to fly and leave behind the sun

Everyday would pave the way
For endless nights and dancing
And every night will fire our minds
And liberate our souls
A home from home
A place that we can go and still be free

There's nothing like you and me
On a beach
Moving with the waves in the sea
There's nothing like you me
Out of reach on the beach
There's nothing like you and me

We will all be back to play
Winter months will just fade away
Making friends and sleeping in the sun

Everyday would pave the way
For endless nights of dancing
And every night will fire our minds
And liberate our souls
A home from home
A place that we can go and still be free

There's nothing like you and me
On a beach
Moving with the waves in the sea
There's nothing like you me
Out of reach on the beach
There's nothing like you and me

Underneath a clear blue sky
You and me on the beach
