12 Days Of Rain

Press my sigh I breed in fever But somehow don't die Rain without end I eat the breath

Your flesh brings life I'm going to see I will never be clean again

I fell asleep at the gate Tonight I feel that demon's hand Your blood that drains my head I eat the breath Your flesh brings me life I will never be clean again

It's like burning myself real A fire to you Commending will what happen Like drowning away in the sea Flowing with the rain I wish to see heaven

You fed me life through vein Life through grain A night to see You fed me life Death's who you want Long yet hunted **October Tide**
