

## Gestation Of Worms

Odious Mortem

Laying in a pool of shit  
Worms crawling out of your severed remains  
Still breathing in consciousness  
Feeling every wiggle of your gestation  
Parasitic spores breeding in the flesh sucking up the nectar of  
decay  
Caracial fluids mixed together with the remains of your bowels  
Disperse  
Scaps of intestines as the dry out in the desert air tender pie  
ces soaked into the ground  
Feast on decay
