

Take Me to Paradise

Ofra Haza

Outlined silhouettes, dancing in the dark
Caught inside your web, you stole my heart
Knew it was wrong from the start
This game is suicide
I told you once before
I feel victimised
'Cause I want you more
How can I say goodbye?
Tonight, tonight,
Running away from you
Running away from you forever

We live in fantasy, we're living in tragedy
But take me to Paradise, take me to Paradise
Take me to Heaven and make me forget
That you'll never be mine

Secret rendez-vous
Dreams that won't come true
Everything I want
I found in you
How can I live this lie?
Tonight, tonight
Running away from you
Running away from you forever
