Sun Of A Gun

Once burned, twice shy Too much of your light make me blind I'd wait all night But you left one too many times I want to change the orbit Don't care what you do now I want to live in darkness Don't want to be spun around

You go down, down, down I fall out of love with you Come back round, round, round You sun of a gun You go down, down, down This time I won't save you When you drown, drown, drown You sun of a gun You sun of a gun

Birds sing for you You can make the blue sky blush You've got them all fooled But I am burned out on this rush I want to change the orbit Don't care what you do now I want to live in darkness Don't want to be spun around

You go down, down, down I fall out of love with you Come back round, round, round You sun of a gun You go low, low, low This time I won't save you When you go, go, go You sun of a gun You sun of a gun

Grey sky creepin, disappearing Bye, bye feeling Heart you're stealing

You go down, down, down I fall out of love with you Come back round, round, round You sun of a gun You go down, down, down This time I won't save you When you drown, drown, drown You sun of a gun You sun of a gun You sun of a gun
