

## Chaos

Ohgr

Assisted paradigm entrusted privately decays  
Behaving all controlled dependent look alike display  
Affection for defection when no refuge all the same  
Dependent never border one world order it away  
Create a way the mind will have to  
Find a way in guarding reason alibis

It seems a way defended reasons  
It seems a way, it seems a way  
Alarming visions, it seems a way

A begging man divine instructed shadow poverty  
A deeply dirty hiding from too many eaten needs  
Protection with selection cover all not needing  
Anything resentment unrelenting  
Change to self destructive means

It seems a way, poor execution  
It seems a way, it seems a way  
Each from a center, it seems a way

Addicted horrified abducted outwardly betray  
Removing all below collective consciousness  
Degrades ascension from depression which  
Cover chosen all the same pretend  
It doesn't matter the world orders it away

Ask as if to find, traces out of time  
Back chews on itself a turn that says it all

Inserting all the tools upon the broken talking dog  
If fleeing dirty shadows off of drawings on the wall  
A funded self of science from disorder and decay  
Its chaos makes you crazy and the realist left to say
