Thin Green Line

So here we are - a thin green line Into the nineties, runnig out of time Extinction of our planet has already begun but don't let them t ell you nothing can be done Some of us are angry & fighting back Non-violent direct action is a means of attack No, we're not giving up without a fight No nuclar plant here - we're going to trash the site Gotta be honest, gotta be blunt If we really want to stop them we've got sab the hunt Smash that bulldozer, watch the flames go higher Pull the plug & cut the wire We get beaten up & send to jail But I don't care if that's what it takes to save the wales Save our Earth, save the wilderness land Are you for us or againts us? Time to make your stand See that whaling vessel sinking into brine Taken out by a limpet mine See those trees standing so tall They've been spiked so they wo n't fall See that excavator going up in smoke Sugar in the petrol tank - that's no joke Ecosabotage in the dead of night Like mushrooms break through concrete in the moonlight
