

# Never Knew Love

Oleta Adams

I know the world  
Turns round and round  
And I know the sun  
Comes up before it goes down  
I just can't explain it, Baby  
But I know it's honestly true  
And I know your love  
Is here for me  
Another mystery, Baby  
I know it's plain to see  
And it's clear to you  
Like the world turning round  
I can always count on you  
I never knew love like this before  
Now my heart's like an open door  
I never knew love like this before  
I really thought I knew love  
They say that love is everything before you came  
You really couldn't prove it by me  
But you've changed my view  
Baby, just believing in you  
I've got this funny feeling  
Way down inside  
Lovin' you, Boy is always on my mind  
I never knew love like this before  
Now my heart's like an open door  
I never knew love like this before  
I really thought I knew love  
[Musical interlude]  
I never knew love like this before  
Now my heart's like an open door  
I never knew love like this before  
I really thought I knew love  
[Alternate chorus]  
I never knew love could feel this way before  
You gave me joy, happiness and so much more  
I never knew love could feel this way before  
I really thought I knew love
