

New Star

Oleta Adams

One day you're here and the next you're gone
I can't get used to this sudden change
Everybody's telling me that life goes on
But life without you feels suddenly so strange
I can't believe how you've touched my life
Just like the light of the sun
And I never knew how much I
depended on you
Now the two of us will have to live as one
There's a new star in heaven tonight
It's gonna be my guiding light
And it shines as far as the eyes can see
Watching over, watching over me
They say that time will heal all wounds
And pain will eventually fade
You've always been the light of my life
And that light will never fade away
There's a new star in heaven tonight
It's gonna be my guiding light
And it shines as far as the eyes can see
Watching over, watching over me

I won't have to be afraid
Your love has given me the strength I need
And I won't ever have to be alone
Cause there's so much of you that lives in me
There's a new star in heaven tonight
It's gonna be my guiding light
And it shines as far as the eyes can see
Watching over, watching over me
