

# Slow Motion

Oleta Adams

So many nights I said a prayer  
That you were out there somewhere  
I lived my life from dream to dream  
But now you're real, so real  
Close your eyes, can you hear our hearts beat together  
I wouldn't care now if time stopped forever

Just want to rock you in my arms in  
SLOW MOTION  
Hold you to my heart so tight  
Just wrap me up in inside the passion in your eyes  
Just want to love you tonight in  
SLOW MOTION  
The world outside can't hurt me now  
There's a shelter I've found in your love  
My soul was once just empty space  
Your warmth filled that place, filled it up  
Close your eyes, can you hear our hearts beat together  
I wouldn't care now if time stopped forever

Just want to rock you in my arms in  
SLOW MOTION  
Hold you to my heart so tight  
Just wrap me up in inside the passion in your eyes  
Just want to love you tonight  
Just want to cradle you and sway in  
SLOW MOTION  
like a gentle wave out at sea  
Just let me touch your face  
And feel your soft embrace  
Reaching the deepest part of me in  
SLOW MOTION

Tonight could never last long enough  
Right now and always, I want your endless love  
[Solo]  
Let's make time for this precious time we've been given  
Live like each second was the last we're living

Just want to rock you in my arms in  
SLOW MOTION  
Hold you to my heart so tight  
Just wrap me up in inside the passion in your eyes  
Just want to love you tonight in  
SLOW MOTION
