## **Clearly Love**

## **Olivia Newton-John**

Where am I when you're not here I see you but we're not clear You wouldn't know How could I show you

Where to look when I'm not here You can hold and have me near But when I go How can I show you love

I just don't know Who am I when you are you I just don't know what to do But when we're here It's all so clearly love
