

This Is the Age

One Way System

This is the age of science fiction
But still you've got your drug addiction
This is the age of computer technology
But still you've got your brain psychology

You're computerised
Then victimised
You're animalised
But paryalysed

This is the age of computer technology
But still you've got your brain psychology
This is the age of science fiction
But still you've got your drug addiction
