Sweet Relief

One Without

With a gun to my head he says We must put an end to this And I say you said you loved me But I know I've seen it pictured in my head

All my fears are gone Sweet relief I welcome you This I've been waiting for all my life

To the pace of my beating heart He starts a dance to death One shot and the dance is over For him but not for me I'm finally free from his chains

All my life I tried To find my way back home I tried but I couldn't do it alone
