

On Course

Oomph!

Only as I slowly freeze
I reach for you,
I reach for you
And now I know where no one's ever been
Right next to you,
Right next to you

Around me radiant white
Deep in this ocean of ice
Where now my compass is lost

I am on course
Straight back to you
The storm drives me over the sea
Away from here
I search for your tracks in the snow

Only because angels freeze
I feel your touch,
I feel your touch
And only after my blood's frozen stiff
I feel so much,
I feel so much

I've been through hell and beyond
Running and cold for so long
And now all my hope is gone

I am on course
Straight back to you
The storm drives me over the sea
Away from here
I'm drifting away

Back on course
Straight back to you
The storm drives me over the sea
Away from here
I search for your tracks in the snow
