

# Deliverance

Opeth

Floating on mist  
Crept up the caverns of my brain  
Receiving no warning  
From nothing to a life code

Walk with me, you'll never leave  
Wait to see your spirit free

Tell me how your heart's in need  
As I drown you in the sea

Unwinding snares of distrust  
Your wrist in my face grip  
Look me in the eye, I'm clear  
This is your time  
Face down beneath the waterline  
Gazing into the deep

From love to death  
In a time span of seconds  
Oblivious to regret  
Pushed into belief  
In liquid cellophane  
Gasping for air  
Mercy in my eyes  
Is the shade of the night

The piercing sounds you make  
Soaring higher, higher now  
And once left in my wake  
Your memory is nothing but the scars on me

All over now  
Forgotten why I needed this  
Standing down  
Disappear into the obscure  
Resting days  
Waiting for new disease  
Biding time  
Looked inside insanity

It always burns within  
The downward spiral never ends  
When driven into sin  
Your salvation's found in a sinner's deed

The devil guides the day  
Tells me what to say  
Pours himself inside  
And snuffs the final light

Deliverance  
Thrown back at me

Deliverance  
Laughing at me
