

The wind lacks breath, everyone's infected now  
You can bring your old friends along  
Are you afraid of your own shadow  
You couldn't find your way out of this paper bag

So move slow  
Move slow

How would you know whether you're coming or going  
When we won't stop 'till we all get a mention  
We're hung-over succinctly crazy  
And now these are crucial days ahead of us

Oh-woah'

If only we could get connected  
We'd know just what to do, ooh  
If only we could steal this moment  
We could give it back to you, ooh  
Embrace these chains we neglected baby  
When we found you  
We'll find you

So use me all up, wear me out  
Ride this gust of wind until the cloud dies out  
For the sake of savin' just one of us  
For the sake of savin' everyone else

Move slow  
Come on, move slow  
Ah

If only we could get connected  
We'd know just what to do, ooh  
If only we could steal this moment  
We could give it back to you, ooh  
Embrace these chains we neglected baby  
When we found you  
We'll find you'

Hoo-hoo-hoo'  
Oh

Let's get connected, get connected  
Ho-woah..  
Let's get connected, get connected  
Ho-woah..  
Let's get connected, get connected  
Huh'
