

When You Made The Mountain

Opus III

La la la la la, la la la la la
The centuries
Going back to zero
Say I'm a fool
And every man a hero
I am the future
I am the coming force
Mother nature
Will take no other course

Somewhere to climb upon
Somewhere to look at you from
When you made the mountain
You made me
When you made the mountain
You made me
When you made the mountain you made me
