Forget what I said and why I said it I don't think you ever wanted to know You'd wanna make an excuse on your own Rather decide who you could blame it on I get the picture you like to deceive Whatever you can so you can get your piece I'll live and die but I will never believe I stayed so long and that I let my whole body bleed What 's f\*\*king wrong with your head? I bet you swear you never did it But I gotta tell you something while we're alone Hide your lies but lies make burns I've got a scar so now I've got a concern You ain't a human, you're more like a disease Some of the sickest shit I've ever seen I'll live and die but I will never believe I stayed so long and that I let my whole body bleed What's f\*\*king wrong with your head? You've got it on too tight
