

Take This Light

Orden Ogan

When all seems lost
You feel all on your own
And pain just tears you apart
Remember this
'Cause you're not alone
And listen close to your heart

When you're feeling cold and sad and thin
You can run to the place where the dolphins swim
And the sun will shine warm and bright down on your skin
Take this light and keep it close to your heart

When black clouds are hanging
Over your head
And you feel like you're better off dead
Ladybeetles and butterflies
Will land right before your eyes

When you're feeling cold and sad and thin
You can run to the place where the dolphins swim
And the sun will shine warm and bright down on your skin
Take this light and keep it close to my heart
Close to my heart
Close to my heart
