

All the Same

Orgy

You think it's all the same
But I want you to believe I could be so like you
By now you've figured out
That I want you educated 'cause it's so like you

Because it's all the same
I could be something like you
Because it's all the same
Watch you kill for me

Everytime I want to and everyday I will be so like you
Hittiing on the helpless smoking with the infants
Cause it's so like you

Because it's all the same
I could be something like you
Because it's all the same
Watch you kill for me

So hidden in the picture wrapping the world around me
They've been insisting there's no difference between us
So hidden in the picture wrapping the world around me
They've been insisting there's no difference between us

Don't listen turn around
People might just see you now
Make yourself a part of me
A part of me to let you go

Because it's all the same
I could be something like you
Because it's all the same
Watch you kill for me

So hidden in the picture wrapping the world around me
They've been insisting there's no difference between us
So hidden in the picture wrapping the world around me
They've been insisting there's no difference between us
