

# Grime of the Century

Orgy

Look at you looking at me like  
everything's good on your side  
When it gets colder on the inside  
And your scandal  
brings out the mean in you  
white collar crime  
you're caught up in the void  
Get ready, let's go  
it's time to kill the noise

I can't wait to get out  
of the grime of the century

Take a good look at me  
is it already over in your head  
One thing we both know for sure  
it can't continue this way  
if we can find a way out  
of the grime of the century

Look at the love  
you show me online  
Cause everything's cool on your side  
it gets colder on the inside  
All your scandals bring out the bitch in you  
White lies, you selfish little boys  
Blame is a game with the kids on the boulevard

I just can't wait to get out  
of the grime of the century

Take a good look at me  
is it already over in your head  
One thing we both know for sure  
it can't continue this way  
if we can find a way out  
of the grime of the century

Keep it on the boulevard  
The pointless noise  
I can't wait to get out  
of the grime of the century  
Is it already over in your head  
But there's something that we both know for sure  
This can't continue, continue like this  
If we can find a way out  
of the grime of the century

Take a good look at me  
is it already over in your head  
One thing we both know for sure  
it can't continue this way  
if we can find a way out  
of the grime of the century
