

Social Enemies

Orgy

Social weapons that miss
Pretend them to save cowards
Bastards to shame
Condemned social slaves
Here to save the freaks again you think and i bet you always will

Here to save the freaks again you think here
Here to save the freaks

Snakes causing the fate
Sadistic and free, so free
Traders, defendants behave
Lies stay away from me
Saints keep knocking
Go home don't sell me mary
No making the crazies well inside you think and i bet you always will

Calling us no good you are the social enemies
We change the people day to day
Making us no good you are the social enemies
Changing the people day to day

Agitators talking the show
Messing with heads to be the number one
Smashers battling the hiv's
Proud of yourselves aren't you
Making the crazies well inside you think and i bet you always will

Calling us no good you are the social enemies
We change the people day to day
Making us no good you are the social enemies
Changing the people day to day

Why must we play so bitter me i'm suffering now the nowhere me
Stop trying to say you fell into this place so tragic you found
the nowhere me

Here to save the freaks again you think here
here to save the freaks
