

# All Things Dead

Origin

An insatiable lustful frenzy  
To expand far beyond the outermost shell  
Assimilate to duplicate - (Procreate)  
Begetting the core cell

Mass production - (Mass consumption)  
Devour inordinately outside of our means  
Excessively manipulating - (Multiply)  
Begetting the genetic seed

All things dead (2x)  
Improvise  
Adapt  
Overcome

All things dead (2x)  
One to many  
Back to none

The process of natural selection  
Altered by the development of the mind  
Genetic re-combinative mutation  
Further narrowing the elite design

Adhere to the dominant of the food chain  
Or fall prey to the path of the malignant  
Purification by survival of the fittest  
Purge, Delete, Sanctify

All subspecies fall to the wayside  
An inherited design of the weak  
Thus begins the hoarding of resources  
Then the slaughtering of the meek

A copious harvest of bloodshed  
Displacing gluttony in contempt

Crawling through desolate plains of ruins  
Bled dry

Scourge of the earth

Our ignorance, indifference, intolerance  
In perpetual bliss  
Oblivious to the damage  
Cause and effect, spoils of the unfit

Vanity  
Incompetence  
Overindulgence to taste  
Laying to waste

Malicious intent without condolence  
To the error of our ways

Complete depletion of sense  
Dismay

Delete a millennias worth  
Stranded  
On a planet of disinterest

Encased  
To our indigenous world of doom

That we destroyed  
That we depleted  
No one to blame  
Our earth is killed  
By living outside our means

Human  
Our own worst enemies

Technological inevitability

Devoid  
Of all dead

All things dead
