

It Was the Night

Other Lives

It was the night that you had left us
You were so gone when the
y found you

It was the hour that you had come back
You were so gone

All of the reasons we're not meant to know

Let the wind sweep over you
And hear the sound that's calling y
ou to come back
We'll find you, we know that you're there

It was the night that you had left us
You were so gone when we
found you

All of the years you can now put behind you

Let the wind sweep over you
And hear the sound that's calling y
ou to come back
We'll find you, we know that you're there
